

SARANYA GOVINDARAJ

Stockholm, Sweden | saranya.shalya@gmail.com | +46 727479028 | [LinkedIn](#)

Experience in Data Analysis | Machine Learning | Deep Learning | NLP | GenAI | LLM | Cloud (AWS, GCP) | RAG | Bedrock | AgentCore | MCP | Claude Code | Kiro | Extremely curious and enthusiastic

SKILLS

Programming Languages: Python, R programming

DevOps & Cloud: Docker, Kubernetes, AWS, GCP

Workflow Automation: Airflow, AWS Step functions

Machine Learning: Python (Machine Learning), Pytorch (Deep Learning), Jupyterlab

Coding Assistants: Claude Code, Kiro

EXPERIENCE

Ericsson, Sweden

Senior Data Scientist

Feb 2022 - Now

Project 1: SCL -System Comprehension Lab:

- Worked on end-to-end RAG (Retrieval-Augmented Generation) solution using complex solution like Knowledge Fabric to integrate all aspects of the data for accurate results.
- Worked on data preprocessing pipeline for multimodal data processing using AWS Step Functions and AWS Lambda.
- Hands-on experience with AWS Bedrock for creating knowledge bases and deploying AI agents for enterprise-grade RAG applications.
- Working on AWS Bedrock AgentCore capabilities for deploying and managing AI agents with observability, token usage tracking, runtime monitoring, and traceability.
- Improved the performance and accuracy of RAG systems by developing graph-based retrieval and optimization solutions.
- Performed Agentic RAG evaluation using benchmark datasets and live production data with RAGAS metrics for response quality assessment. Have deep knowledge on various evaluation strategies using LLM-as-a-judge on assessing the quality of output.
- Working on Agentic AI solutions using Claude Code, Kiro and AgentCore agents as Harness, creating reusable AI components such as sub-agents, skills, MCPs, and hooks for scalable agent development.

Project 2: PIA – Product Information Assistant:

- Developed Python-based automation packages for generating vector embeddings from multiple document sources using both open-source embedding models (e.g., Hugging Face GTE, BGE etc.,) and proprietary embedding models for RAG applications.
- Designed and managed Apache Airflow workflows to orchestrate large-scale data preprocessing, embedding generation, and ingestion pipelines.
- Worked extensively with vector databases such as FAISS, ChromaDB, and OpenSearch for efficient storage, indexing, and semantic retrieval of embedding data.
- Built automation solutions for software registration and compliance workflows, enabling streamlined security approval processes and reducing operational overhead.

Data Scientist

Jan 2020 – Feb 2022

GAIA – TAO Program:

- Anomaly Detection on transport network log files using Machine Learning and Deep Learning models.
- Leveraged statistical models to analyze the difference between test runs (pre & post upgrade scenarios) using EMCA traces and built regression models to predict key baseband scheduler metrics and fine-tuned for better accuracy.
- Developed Cell and Site Categorizer solution based on traffic volume, user experience, and cell load metrics for sites using Classification model (randomforest, xgboost).

Honeywell, Pune**Data Scientist**

Aug 2018 – Sep 2019

Sales Demand Forecasting Project:

- Time series model development in R programming for SIOP (Sales, Inventory and Operations Planning) spare parts forecasting.
- Training and testing various time series model on different SIOP Product family's SKU (Stock Keeping Unit) sales history and chosen champion model with least error.
- Outliers management and tracked the forecasts for evaluation reasons.

Infosys, Pune**Technology Analyst - Data**

Aug 2015 – Aug 2018

PoC's for various clients:

- Predictive analytics on R Studio using various Statistical, Machine Learning and Deep Learning Algorithms.
- Worked on Regression, Classification and Clustering techniques to train/test the model and improve model accuracy.

Infosys, Chennai, Sweden**Application Support Analyst**

Nov 2010 – Jul 2015

Change and Release Manager - Pharma Client

- Managed Change and Release management process for critical Quality control Applications. Involved in task force meetings to represent QC team as change and release manger.
- Been at onsite (Sweden) as QC Application as primary customer point of contact.

EDUCATION

Bachelor of Engineering: COMPUTER SCIENCE

Aug 2006 - May 2010

Karpagam College, Anna University, Tamil Nadu

University rank holder (3rd) in Computer Science department out of 200+ colleges.**CERTIFICATION**

- AWS Certified AI Practitioner - 2025
- GCP - Professional Machine Learning Engineer - 2024
- GCP – GenAI L400 Skills Badge (Building Generative AI Applications with Vertex AI) – 2024.
